Edina Country Club Area Residents

RE: Resident Update Letter No. 4
Infrastructure Rehabilitation Project
Edina Country Club

Dear Resident:

As you may know the Edina City Council has placed the above project on hold until a traffic study is undertaken and concluded for the northeast portion of Edina, see attached Council Resolution.

The City Council did authorize staff to repair the sanitary sewer main lines on Casco and Drexel Avenue. This project will be designed and bids taken this winter for an early summer 2006 construction start. The project will only involve relining the sanitary sewer main and will not require the roadway to be disturbed. This project will be funded through the sanitary sewer fund and no special assessments will be levied for this project.

Sincerely,

Wayne D. Houle, PE
Director of Public Works / City Engineer

Enclosure

C: Paul J. Pasko, III – SEH
Edina Mayor and City Council
