GOLF TERRACE STREET RECONSTRUCTION

Dear Residents:

General Contractor Schedule

Stage 1:

Crews will continue the restoration phase in Stage 1. They will continue to backfill the new curbing, begin to restore irrigation systems, pet fences, landscaping, site clean-up, etc.

Damage to irrigation and pet containment systems will be restored by the contractor. Restoration crews may need to coordinate access to panels in your garage so they can properly adjust and repair the systems accordingly.

At this time, crews are scheduled to replace the sod the week of September 19th, 2011. A better update and timeline on this will be given next week.

Stage 2 and 3:

Crews have removed the pavement and start the removal process in **Stage 2**. They will begin removing the old curb and gutter as well as driveway aprons. This work will be done Friday and should be completed by Monday.

Tuesday, crews intend to begin upgrading the watermain systems in **Stage 2**. This work will take about 2 weeks to complete. The streets will be accessible during the work. You may encounter certain periods when access may be limited. Feel free to ask for help from the crew onsite if you need special assistance.

At this time, crews are scheduled to remove the paved surface in **Stage 3** on Monday, September 19th, 2011. Work will follow by removals and watermain system upgrades in this stage as well.

Important: Crews will continue installing a blue temporary water main pipe to your home. This pipe will provide you with water service during the upgrades to the new water main system. The pipes will be placed across your front lawn and be connected to your house at your hose bib. Crews may need to enter your home to operate your water shut off valve in your basement. This is done to isolate the connections until the new main has been installed and tested. Palda and Sons will coordinate this work with you using a door tag, or by knocking to see if you are home. This will be done on a case by case basis.

Please be careful when cutting your grass near the temporary water service pipe as it can be damaged by your lawn mower. If applicable, please pass this warning along to your lawn service.

While being provided water from the temporary water main, you may notice your tap water is warmer than usual. This is normal. It is caused by the fact that the water main is above ground and subject to ambient air temperatures.

Trash/Recycling Service Pickup:

Because of the construction, the time of day your provider picks up your garbage and recycling has been changed to **Monday, 6:00 a.m., until further notice**. Please have your garbage and recycling at the curb no later than **5:30 a.m.** on the day of pickup.

Safety:

Please remind your children to stay away from construction sites, construction machinery, and stockpiled materials. These sites, machines, and materials can be dangerous. Job site safety is our number one concern for everyone.

Who to Contact in an Emergency:

During a life or property-threatening emergency, call 911. If construction equipment or materials need to be moved as part of dealing with the emergency, 911 has a list of the contractor's emergency contacts.

If it is not an emergency, you can also get a hold of the **police on their non-emergency phone number at 952-826-1600**. They have a list of contractors and contacts if the need for their services arises after hours.

Who to Contact with Questions and Concerns:

Please feel free to contact me if you have any questions. I can be reached in the office at 952-826-0444 or akuznia@ci.edina.mn.us
